INDOOR **NATURAL COLLECTION** 2024

NEW!

HANDMADE FOR YOU.

COMPLETING YOUR STORY

scheurich

Let us share why we, the leading ceramic pots manufacturer, decided to put wicker baskets into our product range.

1. Long-term trends from boho to greenterior: high-quality home accessories made of natural materials are in demand like never before. Adapting our know-how and design expertise in ceramics for wicker baskets we have developed a product selection that meets the consumers' needs. And yours of course as well.

2. Our position is clear: to adhere to the highest standards of **quality, sustainability and responsible production** in every material we offer. Renewable raw materials such as seagrass, rattan, water hyacinth & co fit perfectly into this strategy. We also regularly check the whole production chain to ensure that only high-quality products are available in your shops.

3. inspiration and variety at the POS: our basket range works both on its own and in combination with our ceramic range. Together we can successfully grow our sales!

NATURAL COLLECTION.

Our wicker baskets are handmade from seagrass and water hyacinth. Despite the amazing craftsmanship small deviations in shape and colour may occur: Each wicker basket is unique.

We rely on an established network of local manufacturers who, in accordance with BSCI certification, place great importance on safe workplaces and conditions, fair payment and environmentally friendly processing of the raw materials required.

WATER HYACINTH

Water hyacinth is a fast-growing plant that is naturally available in its countries of origin and therefore does not need to be fertilised or irrigated. After picking and drying, the flexible natural fibres are woven by hand into baskets, rugs and many household items.

Our water hyacinth baskets are waterproofed inside with a solid foil or plastic insert.

SEAGRASS

Seagrass is an undemanding plant that grows in water. It thrives in salty soils without the use of fertilisers or pesticides and is ready for harvesting after only 2 months growth. After drying in the sun, it can be woven by hand into various products.

Our seagrass baskets are waterproofed inside with a solid foil insert.
